Dr.R.D.Gardi School - RAJKOT
2020

• SKILLS

- Programming Languages : Python
- Python Libraries: Pandas, NumPy, Scikit-learn for data manipulation, statistical analysis
- Python : Data cleaning, Transformation, and visualization
- Databases : MySQL
- Tools & Technologies: Power BI, Tableau, DAX, Figma
- Systems : Windows

• LANGUAGE

- English
- Gujarati
- Hindi

• About Me

Aspiring Data Analyst with a strong foundation in statistical analysis, data visualization, and database management. Proficient in Excel, SQL, Python, Tableau and Power Bi. Passionate about leveraging data-driven insights to solve complex problems and drive business decisions. Eager to apply my analytical skills and enthusiasm for data in a dynamic and growth-oriented organization.

• PROJECT

• Fitness Analytic Dashboard

the project is a Fitness Dashboard designed to track fitness activities and health metrics for a gym or health center. It provides an "Orange Theme" user interface displaying key business and client metrics such as revenue, expenses, membership statuses (Platinum, Gold, Silver), and client details, along with a built-in calorie and BMI calculator for personal health tracking. Its goal is to offer a comprehensive, visual tool for managing the facility's financial performance and member data while also providing individualized health calculation tools.

• Blinkit Sales Analysis Dashboard

Built an interactive Power BI dashboard to analyze Blinkit's business performance across sales, customers, inventory, and marketing. Processed and transformed raw datasets using Python (Pandas, NumPy) for integration with Power BI. Developed user-friendly navigation (Overviews, Sales, Customer, Feedback, Inventory, Marketing) for better decision-making.

• COVID-19 Data Analysis and Visualization

"Developed a data analysis and visualization project to explore global COVID-19 statistics, focusing on confirmed cases, deaths, and recoveries across various countries and WHO regions."

• Zomato Business Intelligence Dashboard

Delivered actionable insights on customer behavior, sales trends, and city-level performance that can help Zomato improve marketing strategy and customer retention. Provided business insights on veg vs non-veg sales, yearly growth trends, and city-wise performance to support decision-making.
